1. Introduction

The computer lab Project Sree Sarada Vidyalaya was proposed by Mr. Praveen NP in the Sree Kanchi Sankara Public school, Kalady.

2. Aim

Sree Kanchi Sankara public school is a CBSE school, run by Kanchi Sankara matt in Kalady, Ernakulam district, Kerala. School offers quality education with a minimum fee. Swamiji insisted clearly school should collect only a minimal fee, so as low income people can afford good quality education system.

The other part is that teachers are paid well; they are somehow managing to run the institution.

The requirement now is to set an additional lab constitutes of 25 computers. The computer should have a specification or Pentium IV 2.66 and above.

3. Methodologies

- The idea was proposed in one of the Sreshtabharath meeting and it got approved.
- Mr. Vinod Krishnan helped to collect the used Laptops.

4. Project Execution

We collected a total of 5 laptops and 1 desktop. We bought additional 5 desktops from Bangalore. We were able to hand over two computers to the school and the rest of them needed work to be done on them before we could hand it over. Unfortunately, the floods happened during this timeframe and these computers became unusable. We could not replace the damaged computer.
